

Here at Milngavie Dental Care, we focus on prevention. Here are some top tips to help keep your teeth in the best possible condition.

- 1** When you treat yourself to something sweet, do so at meal times. Sugar turns to acid in your mouth, and it takes 45 minutes to get back to normal. Frequent snacking doesn't let your mouth recover.
- 2** Chew sugar-free chewing gum. This makes saliva flow, protecting teeth and gums against destructive bacteria and acid.
- 3** Remove plaque by brushing and flossing every day, from every surface of your teeth. Everybody has plaque, which is harmful to teeth and gums.
- 4** Spit, don't rinse after brushing. This will leave a coating of toothpaste on your teeth. Choose a fluoride toothpaste which will protect your teeth and gums from damaging acid and plaque.
- 5** Drink water. Fruity drinks may sound healthy, but fruity and fizzy drinks all contain acid which can dissolve your teeth over time and cause decay.
